SUMMARY

BCA graduate and Python Developer with hands-on experience at Cognify IT Solutions, working on web scraping, data visualization, and Python automation projects. Skilled in Python, BeautifulSoup, Scrapy, FastAPI, REST APIs, SQL, MySQL, HTML, CSS, JavaScript, Matplotlib, Seaborn, Plotly, Git, and GitHub. Strong understanding of backend development, data processing, API development, web scraping, automation, and database integration. Seeking an entry-level Python Developer or Backend Developer position.

PROFESSIONAL EXPERIENCE

Python Developer | Intern 08/2026 – Present
Cognifyz It Solution|

- Developed web scraping applications using BeautifulSoup and Scrapy to extract structured data from web sources.
- Performed HTML/XML parsing, data extraction, cleansing, validation, and preparation for analysis.
- Created informative data visualizations using Matplotlib, Seaborn, and Plotly.
- Developed automation scripts for data processing, file management, and report generation.
- Utilized Git and GitHub for version control, code management, and team collaboration.

EDUCATION

Bachelor of Computer Applications(BCA) 09/2022 – 06/2025
Ajeenkya DY Patil University | Pune Pune

SKILLS

Languages: Python, java, Javascript, SQL.
Backend: FastAPI, REST APIs, Uvicorn, Crud Operation, Authentication.
Database: MYSQL, SQLAlchemy, PyMYSQL, NoSQL.
Web Scraping: Beautiful soup, Scrapy, html, xml.
Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, seaborn, plotly.
Tools: Git, GitHub, Visual Studio Code, Postman, FastAPI, Swagger.

Soft skills

Problem Solving| Communication| Team Work|
Time Management| Adaptability

CERTIFICATES

- Python Programming
- SQL
- AWS cloud Fundamentals
- Machine Learning Fundamentals

LANGUAGES

- English| Hindi| Marathi.

PROJECTS

Chat Application Backend

Technologies: Python, FastAPI, MySQL, SQLAlchemy, PyMySQL

Developed a FastAPI-based backend supporting user registration, authentication, and chat functionality.

Integrated MySQL using SQLAlchemy and PyMySQL for reliable data persistence.

Implemented database models, CRUD operations, input validation, password hashing, and authentication workflows.

Tested and documented API endpoints using FastAPI Swagger.

House Price Prediction

Technologies: Python, Pandas, NumPy, Scikit-learn.

Developed a machine learning model to predict house prices.

Performed data preprocessing, exploratory data analysis, and feature preparation.

Applied Scikit-learn algorithms and evaluated model performance.

Job Portal REST API

Technologies: Python, FastAPI, MySQL, SQLAlchemy, JWTAuthentication, Postman.

Developed a RESTful backend API for a job portal using Python and FastAPI.

Implemented user registration and login with JWT-based authentication.

Created separate functionality for job seekers and employers.

Implemented CRUD operations for job postings, applications, and user profiles.

Integrated MySQL database using SQLAlchemy for data persistence and management.

Added request validation, authentication, authorization, and error handling.

Tested API endpoints using Postman and FastAPI Swagger documentation.

Used Git and GitHub for source code management and version control.

E-Commerce REST API

Technologies: Python, FastAPI, MySQL, SQLAlchemy, REST API, Postman

Developed a RESTful API for managing e-commerce products and users.

Implemented CRUD operations for creating, retrieving, updating, and deleting product and user data.

Integrated MySQL database using SQLAlchemy for structured data storage and management.

Designed and implemented API endpoints using FastAPI.

Implemented request validation and handled API responses and errors.

Tested and validated API endpoints using Postman and FastAPI Swagger.

Used Git and GitHub for source code management and version control

Web Scraping

Technologies: Python, BeautifulSoup, Requests, Pandas, html, Css, Javascript, excel, csv.

Developed a Python-based web scraper to extract structure book data from website using request and beautiful soup. processed and stored the scraped data using pandas and exported it to MySQL for future analysis and management
