EXPERIENCE

Python Developer Intern

Cognifyz IT Solutions

08/2026 - Present

- Built Python web scraping applications using BeautifulSoup and Scrapy to extract structured data from web sources.
- Parsed HTML/XML and cleaned, validated and prepared extracted data for analysis using Pandas.
- Created data visualizations using Matplotlib, Seaborn and Plotly.
- Automated data processing, file management and report generation using Python scripts.
- Stored extracted datasets in MySQL and exported cleaned data to CSV/JSON formats.
- Wrote modular, reusable Python code following OOP principles; used Git and GitHub for version control and team collaboration.

PROJECTS

Real-Time Chat Application (Backend)

FastAPI | MySQL | SQLAlchemy | PyMySQL | Pydantic **GitHub** **Live Demo**

- Built a FastAPI REST backend supporting user registration, authentication and chat functionality.
- Implemented password hashing and secure authentication workflows.
- Designed database models and CRUD operations using SQLAlchemy ORM and PyMySQL for MySQL persistence.
- Validated inputs with Pydantic; documented and tested endpoints using FastAPI Swagger (OpenAPI).
- Structured the codebase into modular routers, models and schemas for scalability and maintainability.

Job Portal REST API

FastAPI | MySQL | SQLAlchemy | JWT | Postman **GitHub**

- Built a RESTful backend for a job portal with separate flows for job seekers and employers.
- Implemented JWT-based registration, login, authorization and role-based access control.
- Developed CRUD operations for job postings, applications and user profiles.
- Designed a relational MySQL schema (users, jobs, applications) using SQLAlchemy ORM.
- Added request validation and error handling; tested endpoints using Postman and Swagger.

E-Commerce REST API

FastAPI | MySQL | SQLAlchemy | Postman **GitHub**

- Built a RESTful API to manage e-commerce products and users, following REST principles with proper HTTP methods and status codes.
- Implemented CRUD operations for creating, retrieving, updating and deleting product and user data.
- Stored structured data in MySQL using SQLAlchemy ORM.
- Added request validation and error handling; tested endpoints using Postman and Swagger.

SUMMARY

Python Backend Developer | Python Developer
BCA graduate and MCA student with hands-on experience building REST APIs with FastAPI, JWT authentication and MySQL, plus web scraping and data automation in Python. Currently a Python Developer Intern at Cognifyz IT Solutions, working on data extraction, cleaning, visualization and automation. Skilled in Python, Java, JavaScript and SQL, with practical use of Git, GitHub, Postman and Swagger/OpenAPI. Built 4 backend projects covering authentication, CRUD, database design and API testing. Seeking an entry-level Python Developer or Backend Developer role where I can build reliable backend systems and keep learning.

SKILLS

Programming Languages

Python Java JavaScript SQL

Backend

FastAPI Flask REST APIs API Development Uvicorn JWT Authentication CRUD Operations Pydantic

Databases

MySQL PostgreSQL SQLAlchemy ORM PyMySQL

Web Scraping

BeautifulSoup Scrapy Requests HTML XML

PROJECTS

Fast Box Delivery System

FastAPI | MySQL | SQLAlchemy | JWT | Pydantic **GitHub**

- Built a RESTful backend for a parcel/box delivery system using Python and FastAPI.
- Implemented JWT authentication with role-based access for customers, delivery agents and admins.
- Developed order placement, delivery agent assignment and delivery status tracking features.
- Designed a MySQL schema for users, orders, packages and deliveries using SQLAlchemy ORM, with full CRUD operations.
- Added Pydantic validation, error handling and proper HTTP status codes; tested endpoints using Postman and Swagger.

House Price Prediction

Python | Pandas | NumPy | Scikit-learn | Matplotlib | Seaborn **GitHub**

- Developed a machine learning model in Python to predict house prices.
- Performed data preprocessing, exploratory data analysis (EDA) and feature preparation using Pandas and NumPy.
- Applied Scikit-learn regression algorithms and evaluated model performance using standard metrics.
- Visualized data trends and feature relationships using Matplotlib and Seaborn.

Web Scraping

Python | Requests | BeautifulSoup | Pandas | MySQL **GitHub** **Live Demo**

- Developed a Python web scraper to extract structured book data from a website using Requests and BeautifulSoup.
- Handled pagination, HTML parsing and data cleaning to ensure accurate, structured output.
- Processed scraped data with Pandas and exported it to MySQL for analysis and management.

Personal Portfolio Website

HTML | CSS | GitHub Pages **GitHub** **Live Site**

- Designed and deployed a personal portfolio website on GitHub Pages with Home, About, Skills, Projects, Experience and Contact sections.
- Showcased projects with technology tags and links to GitHub repositories and live demos.
- Added a resume download button and LinkedIn, GitHub and email links for quick recruiter access.
- Used Git and GitHub for version control and deployment.

SKILLS

Libraries

Pandas NumPy Scikit-learn Matplotlib Seaborn Plotly

Tools

Git GitHub VS Code Postman Swagger (OpenAPI) Docker (Basics) Pytest Linux
